

## North Carolina Wildlife Resources Commission

### Sample Request Form

Name of requestor: \_\_\_\_\_

Requestor email: \_\_\_\_\_

Requestor phone number: \_\_\_\_\_

Requestor Affiliation: \_\_\_\_\_

PI Name (if applicable): -

\_\_\_\_\_

Have you already been in contact with someone from our agency? If yes, please provide their name: \_\_\_\_\_

Please provide details about the samples being requested including species, number of samples, sample type (e.g., hair, muscle, saliva, blood, etc.), sampling protocol and storage, and the geographical areas from which you would like them collected. If you have a separate document with these details, you can provide that instead:

Do you plan to participate in sample collection? If yes, please describe your role in sample collection. If not, why?

Please describe the purpose of this sample collection. What is the study they are being used for and how might this study impact management? Include attachment if necessary.

Date samples need to be collected by: \_\_\_\_\_

Please submit this form to [research@ncwildlife.org](mailto:research@ncwildlife.org)

Once this form is received, it will be shared with relevant biologists within the agency for review and comment. You will be notified of our decision on whether we will provide samples within 60 days of form submission. Note that if we do determine we will provide samples, we would require the agency to be acknowledged in any report, publication, and/or manuscript that is produced based on the samples. We would also discuss whether the level of our involvement in sampling should result in being a co-author on any report, publication, and/or manuscript.
